**Federal Highway  
Administration**

*NOTE: All work is scheduled weather permitting and is subject to change without notice.*

**Construction Notification: Temporary  
Traffic Signals to be installed  
on NM 313 on Saturday, Nov. 16, 2019**

Crews will be installing a temporary traffic signal on NM 313 at U.S. 550 from approximately **11 p.m. Saturday, Nov. 16** through about **5 a.m. Sunday, Nov. 17**. One lane will be closed in each direction during this work.

Crews will work on signal timing to maximize traffic flow throughout the day on Sunday, Nov. 17 and will continue to monitor operations on Monday. As they continue to refine the traffic signal operations, it is possible that traffic may experience some backups, particularly westbound traffic on U.S 550 during the afternoon/evening rush hour.

***Please plan accordingly. Seek an alternate route or give yourself extra time to reach your destination on Monday afternoon, Nov. 18.***

***About the Project***

This is the first phase of a nearly two-year project to add lanes, improve traffic flow, enhance pedestrian and bicycle amenities, and upgrade drainage on U.S. 550 between NM 313 (Camino Del Pueblo) in Bernalillo and NM 528 Rio Rancho. The project will also create New Mexico's first continuous flow intersection.
